About

Seqvoia is a very reverent project in terms of the customer's attitude to it. A lot of attention was paid to seemingly insignificant details. I like this approach.
The application will help you take care of your plants, water on time, and if you don't know something, then inside you are waiting for articles from professionals in their field.
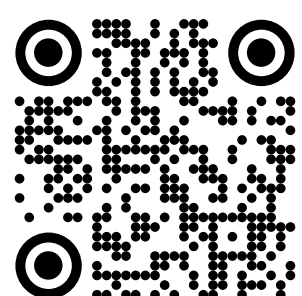

A few basic features

`plant watering log` `seasons change tracking`

`plant care encyclopedia` `sync the safe via iCloud`
